

ABSTRACT OF THE DISCLOSURE

Disclosed is a holder assembly of a drain hose and washing machine using the same, by which assembly of a drain hose extending outside a washing machine cabinet is facilitated and water is smoothly discharged outside. In a washing machine including a tub holding a laundry and water, a cabinet having the tub provided inside, and a drain hose for discharging the water in the tub outside the cabinet, the present invention includes a drain hose holder having an entrance end extending inside the cabinet to be bent inward to facilitate the drain hose to be inserted wherein the drain hose penetrates the drain hose holder to be guided downward and a fixing hole at a lateral side of the cabinet to fix the inserted drain hose holder fixed thereto.
